SKILLS

- **Cloud & Infrastructure:** Microsoft Azure, AWS, GCP, Terraform (IaC), Hybrid/On-Premise Infrastructure
- **DevOps & CI/CD:** Docker, Kubernetes, Helm, Kustomize, Jenkins, GitHub Actions, Gitlab CI, ArgoCD, CI/CD Pipelines, GitOps, DevSecOps
- **Monitoring & Observability:** Prometheus, Grafana, ELK Stack, Logging, Metrics, Alerting
- **Programming & Automation:** Python, Go, TypeScript, Groovy, Java, Bash/Shell Scripting
- **Databases & Querying:** MySQL, PostgreSQL, MongoDB, SQL

WORK EXPERIENCE

- **SCB TechX CO., LTD.** **Bangkok, Thailand**
DevOps Engineer Jun 2025 – Present
 - Design, implement, maintain, and optimize end-to-end pipelines (init, build, test, security scan, deploy) across multiple environments, remove legacy bottlenecks to reduce execution time.
 - Managed Azure infrastructure using Terraform (Infrastructure as Code) integrated with CI/CD pipelines.
 - Contributed to large-scale GitLab-to-GitHub repository migration, refactoring and standardizing CI/CD pipelines to support multiple Git providers without disrupting developer workflows.
 - Contributed to cross-cloud Disaster Recovery (DR) architecture, enabling failover from primary Azure environment to secondary cloud provider by enhancing CI/CD pipelines to support multi-cloud deployments.
- **Freelance (Fastwork)** **Remote / Part-time**
DevOps Consultant & Instructor Jan 2025 – Present
 - Provide DevOps consulting for small to mid-sized software teams, designing and implementing CI/CD pipelines (Jenkins, GitHub/GitLab), containerization strategies (Docker), and Kubernetes-based deployments.
 - Deliver private, hands-on training courses on Docker, Kubernetes, and DevOps best practices for developers and engineering teams.
 - Serve as technical advisor for small-scale software projects, guiding architecture decisions and ensuring production-readiness; consistently rated 5/5 stars by clients for quality and delivery.
- **Chiang Mai University's Faculty of Engineering** **Chiang Mai, Thailand**
DevOps & Full-Stack Developer Aug 2023 – Mar 2025
 - Built and shipped a scholarship management system for Faculty of Engineering, Chiang Mai University.
 - Partnered with stakeholders to refine requirements, deliver key features, and improve application performance.
 - Introduced DevOps best practices that reduced deployment time by 80% and improved reliability.
 - Covered multiple roles (Software Engineer, DevOps) to keep delivery on track.
- **SCB TechX CO., LTD.** **Bangkok, Thailand**
DevOps Engineer (Cooperative Education) Jun 2024 – Oct 2024
 - Identified and resolved complex cloud-related issues within a core banking project through independent experimentation and solution design, sharing validated approaches with senior engineers and cross-functional teams to accelerate problem resolution.
 - Troubleshooted, developed, and optimized Terraform modules for Azure within a core banking environment, ensuring compliance with enterprise banking standards and infrastructure best practices.
 - Designed and implemented an automated configuration validation pipeline, reducing misconfigurations and improving deployment consistency and reliability.
- **CMU PODD Centre** **Chiang Mai, Thailand**
Contract Full-Stack Developer Aug 2023 – Feb 2024
 - Designed and developed an elderly registration and home-visit coordination platform integrated with LINE Official Account and LIFF.
 - Built an intuitive, scalable system supporting nationwide volunteer networks.
 - Automated key workflows to streamline volunteer operations, improving coordination efficiency and response time.

EDUCATION

- **Chiang Mai University**
B.Eng., Computer Engineering
GPAX: 3.87 (First-Class Honors)

Chiang Mai, Thailand
2021 – 2025

CERTIFICATIONS

- Huawei Cloud HCCDA – Cloud Native
- Huawei Cloud HCCDA – Tech Essentials Certificate

PROJECTS

- **Screetner (Street Scanner) | Senior Project**

- Built an end-to-end system to scan and manage local-government assets.
- Developed a mobile app to capture asset data from driving videos with background upload for cloud processing.
- Implemented a video-processing pipeline to detect taxable signboards and visualize results on a web dashboard to support tax assessment workflows.
- Deployed an auto-scaling processing service on Azure to optimize compute cost.

Tech Stack: Python, OpenCV, YOLOv8, Azure Services, Docker, Go, TypeScript, Elysia, Next.js, Flutter, PostgreSQL, MongoDB, Redis

- **OCR Tools (Functional Programming)**

- Developed a modular OCR web app using functional programming patterns to extract and process text from images.
- Applied monads, function composition, and higher-order functions to create reusable, predictable text transformations.
- Used pure functions and immutable data structures to improve maintainability, testability, and scalability.
- Built a declarative UI for viewing, editing, formatting, and exporting extracted text.

Tech Stack: Vite + React, Python

- **BOTMAPS**

- Developed a full-stack web application for visualizing the Computer Engineering Department's floor plan at Chiang Mai University.
- Integrated third-party APIs, such as TeamUp, to retrieve and display real-time room schedules, making it easier for professors and students to access information.
- Enhanced user experience by incorporating features for viewing room availability and course details, improving accessibility and usability.

Tech Stack: Vite React, Golang, MySql
