

Natthaphong Thepphithak

Data Platform Engineer | DevOps Engineer | Software Engineer

✉ natthaphong.thepphithak@gmail.com | 📞 +66 955301640 | 🌐 Natthaphong Thepphithak | 🐙 AuJungZ

Core Competencies

Data Platform: Apache Spark, Apache Airflow, Kyuubi, YARN, Apache Druid, Imply, Trino, Redash

Cloud & Infrastructure: Azure, AWS, Terraform (IaC), hybrid/on-premise infrastructure

DevOps & CI/CD: Docker, Kubernetes, Helm, Kustomize, Jenkins, GitHub Actions, GitLab CI, ArgoCD, GitOps, DevSecOps

Monitoring & Observability: Prometheus, Grafana Stack, ELK Stack

Programming & Automation: Python, Go, TypeScript, Groovy, Java, Bash/Shell scripting

Databases & Querying: MySQL, PostgreSQL, MongoDB, SQL

Professional Experience

LINE MAN Wongnai

Data Platform Engineer

Bangkok, Thailand

Jun 2026 – Present

- Operate and maintain large-scale data platforms including Spark, Airflow, Kubernetes, Redash, Druid, and Imply.
- Troubleshoot production incidents across data processing, query engines, storage, networking, and infrastructure.
- Manage platform deployments and upgrades using Kubernetes, Helm, Argo CD, GitLab CI, and Terraform.
- Support monitoring, observability, access control, and secrets management across the data platform.
- Contribute to building and enhancing internal data platform services.
- Collaborate with infrastructure teams, vendors, and data users to resolve incidents and maintain platform stability.

SCB TechX

DevOps Engineer

Bangkok, Thailand

Jun 2025 – May 2026

- Design, implement, maintain, and optimize end-to-end delivery pipelines across init, build, test, security-scan, and deploy stages for multiple environments, removing legacy bottlenecks and reducing execution time.
- Manage Azure infrastructure using Terraform as Infrastructure as Code, integrated into CI/CD pipelines for repeatable platform operations.
- Contribute to large-scale GitLab-to-GitHub repository migration by refactoring and standardizing CI/CD pipelines to support multiple Git providers without disrupting developer workflows.
- Contribute to cross-cloud Disaster Recovery architecture by enhancing CI/CD pipelines to support multi-cloud deployments and failover from a primary Azure environment to a secondary cloud provider.

Freelance (Fastwork)

DevOps Consultant & Instructor

Remote / Part-time

Jan 2025 – Present

- Provide DevOps consulting for small to mid-sized software teams, designing and implementing CI/CD pipelines across Jenkins, GitHub/GitLab, Docker-based containerization, and Kubernetes deployments.
- Deliver private, hands-on training courses on Docker, Kubernetes, and DevOps best practices for developers and engineering teams.
- Serve as technical advisor for small-scale software projects, guiding architecture decisions and production-readiness; consistently rated 5/5 stars by clients for quality and delivery.

Chiang Mai University's Faculty of Engineering

DevOps & Full-Stack Developer

Chiang Mai, Thailand

Aug 2023 – Mar 2025

- Built and shipped a scholarship management system for the Faculty of Engineering, Chiang Mai University.
- Partnered with stakeholders to refine requirements, deliver key features, and improve application performance.
- Introduced DevOps best practices that reduced deployment time by 80% and improved reliability.
- Covered multiple roles across software engineering and DevOps to keep delivery on track.

Professional Experience

SCB TechX CO., LTD. <i>DevOps Engineer (Cooperative Education)</i>	Bangkok, Thailand <i>Jun 2024 – Oct 2024</i>
- Identified and resolved complex cloud-related issues within a core banking project through independent experimentation and solution design, sharing validated approaches with senior engineers and cross-functional teams to accelerate problem resolution. - Troubleshoot, developed, and optimized Terraform modules for Azure within a core banking environment, ensuring compliance with enterprise banking standards and infrastructure best practices. - Designed and implemented an automated configuration validation pipeline, reducing misconfigurations and improving deployment consistency and reliability.	

CMU PODD Centre <i>Contract Full-Stack Developer</i>	Chiang Mai, Thailand <i>Aug 2023 – Feb 2024</i>
- Designed and developed an elderly registration and home-visit coordination platform integrated with LINE Official Account and LIFF. - Built an intuitive, scalable system supporting nationwide volunteer networks. - Automated key workflows to streamline volunteer operations, improving coordination efficiency and response time.	

Selected Projects

Jenkins Pipeline AI Investigator	<i>DevOps / AI Automation</i>
- Built an AI-powered investigation agent for Jenkins pipeline failures, analyzing console logs to identify the failing stage, extract the probable root cause, and reduce manual triage effort for engineering teams. - Traced errors back to the most likely Jenkinsfile, shared pipeline library, or application code path, improving failure ownership and accelerating handoff between developers and DevOps infrastructure teams. - Generated actionable remediation guidance across application defects, pipeline configuration issues, dependency failures, and infrastructure incidents.	

Tech Stack: Jenkins, Jenkins Pipeline, Groovy, Python, LLM, CI/CD, DevOps Automation

Screetner (Street Scanner)	<i>Senior Project</i>
- Built an end-to-end system to scan and manage local-government assets. - Developed a mobile app to capture asset data from driving videos with background upload for cloud processing. - Implemented a video-processing pipeline to detect taxable signboards and visualize results on a web dashboard to support tax-assessment workflows. - Deployed an auto-scaling processing service on Azure to optimize compute cost.	

Tech Stack: Python, OpenCV, YOLOv8, Azure Services, Docker, Go, TypeScript, Elysia, Next.js, Flutter, PostgreSQL, MongoDB, Redis

Education

Chiang Mai University <i>B.Eng., Computer Engineering</i> GPAX: 3.87 (First-Class Honors)	Chiang Mai, Thailand <i>2021 – 2025</i>
